

## Quality Policy

Biodiversity Assessment and Management Pty Ltd provide high quality biodiversity assessment and management consulting services.

Our goals are to ethically, efficiently and professionally deliver our services with outcomes that benefit our clients, stakeholders and the environment. We also have a number of measurable objectives that contribute to and support these goals. We will achieve them by consistently identifying and meeting the requirements of our customers and other key stakeholders.

We believe that the key to success in this regard is our QMS (quality management system) based on the international standard ISO 9001:2015. This ensures that effective controls are consistently applied to our work processes, and provides a record of our quality-related activities.

We are committed to maintaining, and continually improving this system. All employees and suppliers are invited and expected to share in this commitment. We have allocated sufficient resources to ensure that quality remains at the heart of our business.

Any suggestions that may assist us to achieve our aims are welcomed.

This policy and our QMS will be regularly reviewed by senior management to ensure continued effectiveness and improvement.

Paulette Jones
